PROFESSIONAL SUMMARY

Software Engineering undergraduate experienced in full-stack development, applied computer vision, and machine learning. Developed and completed research on BaggageLens, an AI-powered airport luggage identification system using ConvNeXt-Tiny with ArcFace deep metric learning, benchmarked against EfficientNet-B4, and implemented using React, Node.js/Express, FastAPI, and MongoDB Atlas. Completed a 6-month software engineering internship at SriLankan Airlines, gaining practical experience in full-stack web application development. Strong foundation in software engineering, system security, UI/UX, deep learning, and computer vision. Seeking a graduate Software Engineer role to apply full-stack and applied ML skills to real-world products. Competitive basketball player, demonstrating discipline, teamwork, and a performance-oriented mindset.

PROJECTS

BaggageLens AI-Powered Luggage Identification System for Lost Luggage Problem

Software Engineering Final-Year Research Project, 2026

- Developed an AI-powered luggage identification system using ConvNeXt-Tiny with ArcFace deep metric learning that allow passenger to find their lost luggage using an image.
- Achieved 89.41% Rank-1 accuracy, outperforming the EfficientNet-B4 baseline of 60.37%
- Designed a microservices-based system using React, Node.js/Express, FastAPI, and MongoDB Atlas for practical airport lost-luggage management

SinOCR – Sinhala Handwritten OCR Student Registration System

Software Engineering Group Project, CINEC Campus

- Developed a student registration system to recognize handwritten Sinhala characters and automate Sinhala-to-English translation of Student Information in Sinhala-first environments where English-based data entry may be a barrier.
- Applied Tesseract OCR, Python, Artificial Intelligence, and Machine Learning techniques to address language-related challenges in digital data entry.

SKILLS

- Node
- Flutter
- OOP
- CI/CD
- Supabase
- AI
- React
- React Native
- Design Patterns
- Git
- MongoDB
- ML

PROFESSIONAL EXPERIENCE

Software Engineer Trainee | 2025 July - 2026 January

SriLankan Airlines Pvt Ltd.

- Assisted in developing web-based applications including booking widgets, payment gateways, and multilingual content (.NET, C#, HTML, CSS, SQL)
- Implemented database solutions and performed data management tasks including synchronization between live and cube databases, data extraction to CSV formats, and validation for LMS user account creation
- Conducted functional and UI testing on QBank aviation examination system, documented bugs, and collaborated with development teams to validate fixes and ensure system reliability

RESEARCH PUBLICATIONS

- Oral Presenter at 7th CIRS 2026 - AI-Powered Luggage Identification System for Airport Passengers
- Poster Presenter at 5th CIRS 2024 - Decentralized Data Storage Network for Medical Researchers

EDUCATION

- BSc (Hons) in Software Engineering - CINEC Campus | 2022 September - 2026 November
- BIT (external) University of Colombo School of Computing | 2022 - 2026
- Advanced Level, Ordinary level - Ave Maria Convent Negombo | 2006 - 2019
